KRUSTY — simplified axial cut (not to scale)
2 Stirling convertors +
6 thermal simulators
8 sodium heat pipes
central B4C rod
vacuum vessel
BeO radial reflector
(raised around core)
HEU U-7.65Mo fuel
(annulus: 11 cm OD,
4 cm ID, 25 cm tall)
stainless steel
radial shield
platen
BeO axial
reflectors
platen lifts the radial reflector
into place → adds reactivity
Original schematic drawn from public descriptions (Poston et al. 2020; Sanchez et al. 2020).
